

Motor Neurone Disease factsheet

Manchester Motor Neurone Disease (MND) Care Centre

The Manchester Motor Neurone Disease Care Centre provides support and care for people who are undergoing investigations or have been given a diagnosis of MND (or an associated condition) in Greater Manchester and surrounding areas.

Our aim:

is to help people to live well with MND and to provide a co-ordinated and accessible service for people living with MND and their family and carers.

We do this by

- Providing specialist advice, support and information in all aspects of the care of a person living with MND by offering access to a range of health professionals and developing individual treatment plans
- Offering regular, specialist MND clinic appointments. These are usually held on Wednesday afternoons at Salford Royal Hospital. We also have a monthly outreach clinic at a local hospice.
- Being an effective and coordinated link between hospitals, community services and other health and social care professionals who may be involved in a person's care.
- Ensuring that the right professionals and teams are involved at the right time.
- Working closely with the MND Association who provide information and support for people living with MND. Their Association Visitors attend clinics and are always happy to chat with people.
- Providing information and guidance about opportunities to be involved in research

Further information

There is a wealth of information and support available from the Motor Neurone Disease Association, both for people living with MND and professionals.
